

Amendments to the Specification:

Please replace paragraph [38] with the following amended paragraph:

[38] On the outer surface of the camera 50, a spring rest 53 can be formed. On the spring rest ~~52~~ 53, one end of a spring 54 can be supported. Accordingly, the spring 54 can provide resilient force for rotating the camera 50 about the hinge pin 52 in one direction. For this reason, the other end of the spring 54 can be supported on one side of the camera chamber 21. It is preferred that the spring 54 can be provided on both ends of the camera 50 for the stability of the spring 54.
